Press Release

On March 22, 2011 charitable Rotary Club Stavropol has donated an incubator for neonatal intensive care unit of the Stavropol Regional Clinical Hospital of Infectious Diseases. At present this is the first and only incubator in the local HID (Hospital of Infectious Diseases). Funds for the purchase of an incubator - 417 200 rubles (app. \$14 700) - were collected under the social project named "Many a little makes a mickle" aimed at diseased babies.

Rotary Club Stavropol is a charitable organization, part of Rotary International association. In September 2010 Rotary Club Stavropol studied and analyzed the need of Stavropol clinics in medical equipment and launched the project «Many a little makes a mickle».

The Club set the goal - to raise funds for the purchase of modern Swiss incubator for the neonatal intensive care unit. The advantage of the incubator is that it can operate without the additional financial costs on consumables. Such a choice is made for a reason - it is important for us that the equipment is not standing dead weight.

The money was raised by both individuals and enterprises. The required amount was collected in 6 months. In March 2011 the equipment was brought and installed in the Hospital, medical personnel were trained to work with it. A little patient has already been successfully treated in March - the premature baby of the Stavropol Region.

Babies with infectious diseases had to be transferred to other incubator-equipped hospitals of Stavropol – says hospital senior physician, Alexander Boblov . So, there had to be stopped all the CPR in order to avoid infecting other patients. Now everything has changed. Thus, an incubator not only helps to save lives of young infected patients, but also ensures smooth operation of other medical institutions of Stavropol.

Sincerely,
SGBOO President of Rotary Club "Stavropol"
Oleg Petrovich Dronov
